

About Company

Spareomatic India is counted as the prominent Manufacturer & Supplier of a varied range of spare parts & equipment used in Pharmaceuticals, Chemicals, API's, Cosmetics, Agriculture, Foods and all other related industries.

We also provide the additional services & maintenance of all type of machines Pharmaceutical, API's and other related industries.

Our Best Selling product

The features and benefits of Spareomatic Company's Vibro Shifter make it an efficient, versatile, and customizable solution for particle separation and sizing, with easy maintenance and space-saving design.

VIBRO SHIFTER

Features :

- Capacity (In Inch) - 12, 20, 30, 36, 48, 60 and 72
- cGMP Model and Design as per ASME guidelines
- MOC-SS304/ SS316/ SS316L/ Hastelloy
- Qualification Documents - IQ, DQ, OQ and FAT Protocol

Optional Items/ Accessories :

- Ultrasonic sonoscreen mesh arrangement for a better result (decrease of sieve screen blinding and clogging)
- Mesh De-Blinding Kit with Silicon/ PTFE Balls.
- Flame safe and Flameproof Motor (Imported)
- FLP DoI Starter
- Magnetic Grill
- Single/ Double/ Three/ Four deck.
- USFDA Grade Lead-Free Silicon Molded Screen

MULTI MILL

Features :

- Capacity (In HP) - 1, 3, 5 and 7.5
- cGMP Model and Design as per ASME guidelines
- MOC-SS304/ SS316/ SS316L/ Hastelloy
- Qualification Documents - IQ, DQ, OQ and FAT Protocol

Optional Items/ Accessories :

- Belt Drive/ Direct Drive with VFD
- Full SS Construction including bearing housing and motor mounting plate
- FLP Panel
- Magnetic Grill for Outlet
- Mechanical Seal
- Sieves available - 0.3 - 12 MM
- Vacuum loading system for charging the material

The design of our portable Multi Mill offers a low maintenance & versatile solution for high-speed granulation, pulverization, mixing, shredding, and chopping of both wet and dry materials, with precise control of particle size without requiring any special attachments.

CO MILL

Features :

- Capacity (In HP) - 1, 3, 5 and 7.5
- Sieves available - 0.5 - 10 MM
- MOC-SS304/ SS316/ SS316L/ Hastelloy
- Low heat, Low dust, Low noise operations.
- Feeding flexibility with multiple applications.
- Easy to change and clean design.
- Handles sticky, gummy, heat sensitive, heat and moist material.
- Output more than multi-mill.

Our Co-Mill is well-engineered combination of low-velocity operation, an optimized design, and geometry of the impeller and screen. It's specifically designed for efficient size reduction & homogenization with minimal heat, dust, and noise emissions for both wet & dry granulation process.

Note:-
Spares items also available like Gasket, Screen, Rotor Assembly, Hopper, Motor, and other components etc.
